EDUCATION

Columbia University

Bachelor of Arts in Computer Science & Financial Economics

New York, NY

Aug 2024 – May 2028

- Cumulative GPA: 3.87/4.0 (Dean's List all semesters); Singaporean citizen eligible for H1-B1 visa (no lottery)
- Relevant Coursework: Data Structures & Algorithms, Advanced Programming, User Interface Design, Discrete Mathematics

EXPERIENCE

White Manna Capital Partners

Software Engineer & Equity Research Intern

Oradell, NJ

Mar 2026 – Present

- Built a Python application to automate real-time equity price tracking for 25+ securities, integrating REST API data retrieval with structured data processing and Excel export via `openpyxl`
- Designed modular data pipeline with scheduled API calls, error handling, and structured output to dashboards used by portfolio managers to monitor 1Y/5Y price ranges and flag trading opportunities
- Built 3-statement and DCF models across 8+ public companies with bull/base/bear scenarios and produced investment memoranda across healthcare, pharma, and biotech to inform long/short positioning

LXL Capital

Investment Banking Analyst Intern

New York, NY

Jul 2025 – Oct 2025

- Screened and analyzed 500+ energy startups by revenue growth, margins, and capital structure to prioritize advisory targets, strengthening the firm's deal origination pipeline and supporting \$3M+ in deal flow
- Developed EV sector primer analyzing financials of 5 startups and published 8 sector newsletters covering M&A and capital markets trends across EV and healthcare

HelloTech

Software Engineer Intern | [GitHub](#)

Singapore

Jan 2022 – Feb 2022

- Built a Python Selenium automation tool on Linux/macOS to scrape live USD/SGD exchange rates from a dynamically rendered banking website at 60-second intervals, using headless Chrome with explicit waits and regex parsing
- Implemented a secure SMTP email alert system with environment-variable credential handling to notify users when exchange rates exceeded thresholds, reducing manual data collection by 3+ hours per week

PROJECTS

F1 Driver Profile Web App | *Flask, Jinja2, jQuery, AJAX, Bootstrap* | [GitHub](#)

Mar 2026

- Built a full-stack CRUD web application in Flask with 6 routes serving dynamically rendered pages for a database of driver profiles with career statistics, teams, and biographical data
- Implemented server-side search with case-insensitive regex matching and on-page term highlighting using Python `re` and Jinja2 Markup, plus asynchronous add/edit forms with jQuery AJAX and client- and server-side validation returning field-level errors without page reloads
- Structured templates with Jinja2 layout inheritance and styled a responsive multi-page UI with Bootstrap

TCP Chat System | *C, POSIX Sockets, Linux*

Dec 2025

- Built a TCP client-server chat application in C using POSIX sockets to handle real-time network connections, with server-side connection handling, message I/O, graceful disconnects, and custom message parsing

Poker Game Engine | *Java, Object-Oriented Design*

Nov 2024

- Designed a poker engine in Java using OOP (Card, Deck, Player, Game), with shuffling, dealing, betting, bankroll management, and custom sorting/comparison algorithms to score hands

LEADERSHIP & INVOLVEMENT

Singapore Armed Forces, Military Police Command

Lieutenant, Infantry Officer

Singapore

Mar 2022 – Jan 2024

- Built a Python tool to automate duty scheduling in Excel, reducing planning time by 10+ hours per month; led battalion-level events for 300+ soldiers

Columbia X Morningside Investments Stock Pitch

Case Team Leader – 1st Place (Gold Medalist)

New York, NY

Oct – Nov 2024

- Won 1st place pitching S&P Global with theses on recurring revenue, pricing power, and FCF conversion; presented to judges from Discreene Group and MayTech Global

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, HTML/CSS

Frameworks & Libraries: React, Node.js, Flask, Jinja2, jQuery, Selenium, Bootstrap, openpyxl

Tools & Platforms: Git, GitHub, Linux, REST APIs, AJAX, Bloomberg Terminal, Capital IQ, FactSet

Spoken Languages: English (Native), Mandarin (Fluent)
