EDUCATION

Columbia University

New York, NY

Bachelor of Arts in Computer Science and Financial Economics

Aug. 2024 – May 2028

- GPA: 3.87/4.0; Dean's List all semesters; Singaporean citizen eligible for H-1B1 visa
- Relevant Coursework: Data Structures & Algorithms, Advanced Programming, User Interface Design, Discrete Mathematics, Artificial Intelligence, Databases, Linear Algebra

EXPERIENCE

Software Engineer & Research Intern

Mar. 2026 – Present

White Manna Capital Partners

Oradell, NJ

- Built an internal research dashboard using **Next.js**, **React**, and **Google Drive API** to centralize investment decks, models, memos, and transcripts across the firm's research library
- Automated earnings calendar and valuation metric tracking in **Google Sheets** using **Apps Script**, **JavaScript**, and **Alpha Vantage API**, reducing recurring manual lookup for coverage tickers
- Implemented ticker-based search, file browsing, and document-type filtering workflows to help analysts retrieve materials by company, update recency, and research category

Software Engineer Intern

Jan. 2022 – Feb. 2022

HelloTech | [GitHub](#)

Singapore

- Built a **Python** and **Selenium** automation tool to scrape live USD/SGD exchange rates from a dynamically rendered banking website every 60 seconds using headless Chrome, explicit waits, and regex parsing
- Implemented threshold-based **SMTP** email alerts with environment-variable credential handling, reducing manual exchange-rate monitoring by 3+ hours per week

PROJECTS

LeetBattle | *Next.js, React, Tailwind CSS, TypeScript*

[Website](#) | [GitHub](#) | Jun. 2026

- Built a competitive coding practice platform with a responsive **Next.js** interface for gamified LeetCode-style questions
- Built reusable **React** components and **Tailwind CSS** UI flows for landing, dashboard, and user-facing pages with scalable frontend structure
- Designed frontend flows for coding battles, rankings, match history, and performance analytics to support future user-progression features

F1 Driver Profile Web App | *Flask, Jinja2, jQuery, AJAX, Bootstrap*

[GitHub](#) | Mar. 2026

- Built a full-stack CRUD web application in **Flask** with dynamic **Jinja2** pages for browsing, searching, adding, and editing Formula 1 driver profiles
- Implemented case-insensitive regex search with highlighted results, **AJAX**-based add/edit forms, and client/server-side validation returning field-level errors without page reloads
- Structured reusable **Jinja2** templates with layout inheritance and styled a responsive multi-page UI with **Bootstrap**

ColorAlong | *Flask, JavaScript, HTML/CSS, JSON*

[GitHub](#) | Dec. 2025

- Collaborated on a **Flask**-based educational web app for color theory, implementing interactive quiz and color-matching flows using **JavaScript**, **JSON**, and **Flask** routes

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, C, HTML/CSS

Frameworks: React, Next.js, Node.js, Flask, Jinja2, Bootstrap, Tailwind CSS

Libraries: Selenium, jQuery, AJAX, openpyxl

Developer Tools: Git, GitHub, Linux, Vercel, Google Drive API, Alpha Vantage API, REST APIs, Apps Script
